## Who Are We

Terramet infrastructure & Engineering & Pvt. Ltd. (TIE), is among the most valuable construction & development company. Renowned for our expertise in PEB Structures, Civil Constructions, Fabrications, development, and project management, we are committed to crafting new lifestyles through exceptional design, superior build quality, and timely project delivery.

Formerly known as PIPL, TIE has over a decade of experience in the development, landscaping, and construction industry. Our journey began with a focus on EPC projects, where we established a reputation for reliability, flexibility, and an impeccable track record. From Remote areas to Cities, Jharkhand in the north to Tamil Nadu in the south, we have successfully delivered projects.

Headquartered in Hyderabad, the capital of Telangana, India's newest state, TIE is positioned for a bright future. We have broadened our expertise to include independent development in construction, landscaping, real estate, infrastructure development, and project management. With a solid track record and a forward-looking vision, we are committed to leading the industry and delivering excellence in every project.

— **Basker Prabhakar**  
Managing Director and CEO

# What we do

**TERRAMET**

- ◆ **Consulting Services:** Comprehensive feasibility studies, planning, and engineering solutions that define project viability and execution strategy.
- ◆ **Architecture:** Innovative and functional architectural designs that balance aesthetics, sustainability, and client requirements.
- ◆ **Development:** End-to-end development of residential, commercial, and industrial projects from concept through realization, ensuring long-term value.
- ◆ **Project Management:** Complete project planning, coordination, cost control, and execution management to ensure timely and efficient delivery.
- ◆ **PEB Structures:** Specialized Pre-Engineered Building (PEB) solutions offering cost-effective, durable, and fast-track structural systems.
- ◆ **Fabrications:** Precision steel and metal fabrication services tailored to industrial, commercial, and custom construction needs.
- ◆ **Construction (Buildings):** Residential, commercial, industrial, and institutional building construction executed with a strong focus on quality and safety.
- ◆ **Infrastructure:** Construction of roads, bridges, railways, airports, and public utilities supporting large-scale infrastructure development.
- ◆ **Mining Infrastructure & Industrial Plants Construction:** Specialized construction of mining infrastructure and industrial plants, ensuring compliance, durability, and operational efficiency.

# TERRAMET

## Our Major Projects

- ◆ Presently working with Lloyds Group at Aldandi, Gadchiroli, Maharashtra for construction of Gated community along with Gadgetry Works, Steel PEB, High Machine Installations, beneficiation plants Civil works, Conveyor Belts Civil works
- ◆ Indoor Sports Stadium/Training Facilities: Developed indoor sports stadiums and training facilities in Hyderabad, Bhubaneswar, and Assam.
- ◆ Vehicular Underpasses (VUP) in Hyderabad, Telangana: Built two VUPs on a turnkey basis.
- ◆ Four-Lane Road Execution in Tamil Nadu (NH 44): Through our sister company, we have partially executed the construction of 25 km of a four-lane road, including a rail overbridge, river overbridge, culverts, and minor bridges, on an EPC basis.
- ◆ Satellite Township Near Hazaribagh, Jharkhand: Constructed a satellite township for a prestigious mining company on a turnkey basis.
- ◆ Luxury Villas in Hyderabad, Telangana: Completed the construction of 100 luxury villas.
- ◆ Gated Community Construction in Jodha, Odisha: Developed a comprehensive township, including a corporate office and residential colony, on a turnkey basis.

# Our Technological Expertise

## Use of Advanced Technologies:

- **Building Information Modeling (BIM):** Utilizing BIM for efficient planning, design, construction, and management of buildings and infrastructure.
- **Drones for Site Surveys:** Employing drones for accurate and efficient site surveys and monitoring.
- **AI and Machine Learning in Project Management:** Implementing AI and machine learning to enhance project management processes and decision-making.
- **Green Building Technologies:** Adopting sustainable and eco-friendly building technologies to promote green construction practices.
- **Green Building Technologies:** Adopting sustainable and eco-friendly building technologies to promote green construction processes.

# Our Safety and Quality Assurance

## ➤ Safety Protocols:

We implement rigorous safety measures to ensure the well-being of our workforce and stakeholders on every project site. Comprehensive training programs are conducted regularly to educate employees on the latest safety practices and procedures, ensuring a culture of safety and compliance with industry standards. This proactive approach minimizes risks and promotes a safe working environment.

## ➤ Quality Control:

At every stage of construction, we enforce strict quality control procedures to ensure that all projects meet the highest standards. This includes thorough inspections, adherence to industry best practices, and continuous monitoring to guarantee the durability, safety, and excellence of our work. Our commitment to quality is reflected in our meticulous attention to detail and dedication to delivering superior results.

## ➤ Certifications:

We have achieved ISO certifications, reflecting our commitment to international quality and management standards. Our dedication to excellence has also been recognized through numerous industry awards and accolades, highlighting our superior performance, innovation, and adherence to best practices in construction and project management.
